OPERATION

The 3025 is designed to withstand vigorous conditions and is made of all 316 stainless steel wetted parts. The design and accuracy of this Teltherm gauge complies with BS EN 837-1:1998 for class 1.6 pressure gauges.

FEATURES

- DUAL SCALE** kPa and psi standard, other engineering units available on request.
- ACCURACY** ±1.6 % of full scale. Gauges are tested on ascending and descending pressure.
- LIQUID FILLED** This acts as a dampening agent for the sensitive element and movement and also reduces pointer flutter to allow easier reading. Gauge service life is therefore extended. Normal fill is glycerine.
- THREAD TYPE** Standard ¼ " NPT
Others available on request: ¼ " BSP
